Body strength has been fully upgraded

Provide a strong guarantee for the violent playability of the vehicle

Flip type roll cage

Motor base is suitable for 5287./1717 brushless motor

The DBX-07 RTR vehicle weighs about 6.7KG, and the gear ratio is 1/15.

Use double bottom bracket to replace the traditional brace, save more space and make the overall layout more centered,

The center of gravity is lower and it is easier to control. The bottom plate uses 4MM thick aluminum alloy 6061T6 aluminum plate,

CNC lightweight processing and anode hardening, reaching 1/5 of the car's strength.

The front and rear shock absorbers, steering cup, rear axle seat, motor seat, etc. are all made of aluminum alloy 6061CNC.

The battery compartment has a width of 50MM, the longest length can accommodate 155MM, and the magic band is fixed.

The thickness theory has no upper limit, and the ESC can accommodate Hobbywing MAX6.

The motor base can be adapted to 5287/1717 specification brushless motors.

DBX-07 adopts a fully electroplated cage super-tough roll cage, It is more emulated while protecting the body in all directions.

And there are extremely extreme off-road racing style cockpit interiors and various appearance simulation details.
