#### Product Description

##### Points:

- 1,2.4GHz Remote Control: With the 2.4GHz remote control, the remote control distance is farther, and many people use it without interference. The resin simulates the crocodile head and the shape is realistic.
- 2, Fast Moving: The four-channel operation of moving forward and backward, mimicking the speed and movement of the real crocodile, and freely moving on the water.
- 3, Waterproof Function: Low-voltage protection when the voltage is too low. The speed will automatically drop by 40%, reminding consumers to recall the remote-controlled boat. Waterproof performance is good because the charging port is equipped with rubber waterproof plug and the bottom of the ship is fully enclosed the waterproof settings.
- 4, Stable Boat: When the water-inducing paddle shaft is in contact with the water surface and the fluid can be quickly turned on after sensing the fluid. At the same time, the balanced double-spiral paddle is used to make the speedboat sail more smoothly and without fear of overturning.
- 5, Use Note: The simulated crocodile remote control boat helps stop pests, geese and other waterfowl away from the pond. Effectively drive waterfowl and protect the pool.
